

The ScholarChip CloudPlus Visitor Manager application extends the same level of power and versatility of its enterprise class Visitor Manager system while cutting back on cost and equipment; perfect for application to locations with small spaces or areas with low traffic. The CloudPlus version is delivered via an advanced Web Appliance architecture without compromising the speed and accuracy that the ScholarChip Visitor Manager System is known for.

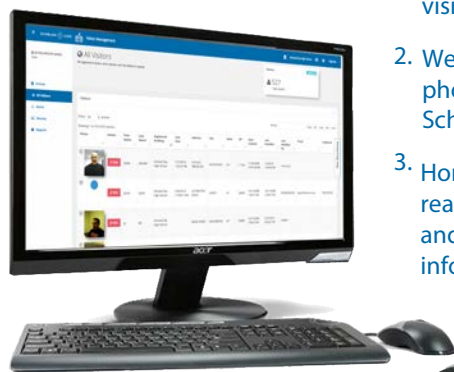

Security Services

CloudPlus is a Component of the ScholarChip Cloud and an Integrated School Safety and School Operation Service.

ScholarChip® CloudPlus Visitor Manager

The CloudPlus version immediately checks for registered sex offenders using ScholarChip's highly accurate and current database. In addition, custom alerts can be created for current and new visitors and notifications of incoming visitors can be sent out to staff and school personnel. Pre-approved visitors can be imported into the system at any time. The entire system, including an intuitive dashboard and powerful reporting functionality, is always available from the visitor management portal. The portal supports Single Sign-on (SSO) with the most modern Student Information Systems and other SAML providers (such as Active Directory) for ease of implementation and use.

The CloudPlus version runs on any standard Chrome of Edge browser utilizing the ScholarChip Hardware Interface Service (HIS):

USB Hub included

1. Thermal printers for printing visitor badges and passes
2. Web camera to take visitor photos and store them on the ScholarChip secure cloud
3. Honeywell® imager for rapid readout of all driver licenses and extraction of visitor information
