

Mobile devices that can securely communicate with student ID cards make it easy for schools to provide information and functionality when and where it's needed. Our NFC enabled tablets can read student smart cards allowing quick access to student information and schedules. This adds up to meaningful improvement to building management and campus safety.

Attendance Services

Mobile Apps are a component of the ScholarChip Cloud.
An Integrated School Safety and School Operation Service.

ScholarChip® Mobile Apps

With a tap of our card our Apps will display a student's photo, their demographics and schedule, allow administrators to issue discipline referrals, even take attendance. Our Apps run best on Android NFC-enabled tablets. Right out of the box, NFC tablets securely communicates with our smart ID cards. By implementing smart technology, administrators can further secure the campus and reduce hall traffic.
