

Designed with student success in mind, ScholarChip ABE places focus on behavior and social success by emphasizing its importance. Explaining to students why their decisions have consequences and demonstrating why positive change is important provides at-risk students the skills to help them succeed academically while altering their life path towards a brighter future. We provide teachers and administrators with an immediate tool for behavior correction.

**Student Engagement**

ABE is a division of ScholarChip.

An Integrated School Safety and School Operation Service.

# ScholarChip® ABE, Behavior Management & Intervention

As part of ScholarChip's School Safety & Operation System, Behavior Management & Intervention refers to software that empowers teachers to work through student performance patterns. Educators have at their fingertips, one of the most comprehensive methods to combat class disruptions. It starts with a reported misbehavior by a student; next, a corrective course of action is determined for the teacher to take; and finally, the student is positively reinforced through interactive software to deter repeat offenses. The process supports teachers in achieving milestones with individual students to ultimately improve lesson time.

## Features & Benefits:

Provides administrators with an online method of recording and acting on student behaviors

Intuitive user interface

Enhances classroom climate

Improves overall lesson time

Paperless Discipline Referral saves teachers time and eliminates paper costs

Behavioral Intervention Services enrolls students in a behavior reward program

## Correlating Services:

The One Card (smart ID card issuance)

Hallway Monitor App
