

ScholarChip is a smart card industry leader, and our One Card is the only true one card system available to K-12. Together the One Card with ID Manager software is the baseline component of a School Safety and Operations System.

Issuing our One Card to both students and staff is just the beginning of securing your school. It is a straightforward path to future options such as tapping the card for door access; managing cafeteria purchases; and building, bus, and classroom attendance.

Identity Services

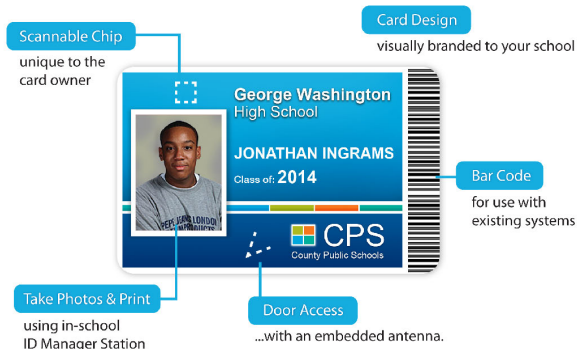

ID Manager is a component of the ScholarChip Cloud.
An Integrated School Safety and School Operation Service.

ScholarChip® ID Manager

Issuing The One Card

Card issuance is a unique combination of in-school hardware and cloud computing. Our high volume card issuance stations take photos, produce smart IDs, search card holder records and manage batch printing.

Hands down, we provide the easiest, fastest and most secure way to deliver smart IDs to a single school, or district-wide.

ID Manager Bundle, Desktop Version.
