

Schools automate the management of their free and reduced eligibility and food service accounting because it's complex. Put your food service back office onto our cloud and process your transactions with the accuracy and speed typical of a high-end financial system. Have a cafeteria Point-of-Sale system that is fast, always available, highly secure and compliant, as well as being easy to use and to maintain. At ScholarChip, we know schools and how to successfully integrate POS at your school.

Financial Transactions

Point-of-Sale is a component of the ScholarChip Cloud.
An Integrated School Safety and School Operation Service.

ScholarChip® Cafeteria Point-of-Sale

ScholarChip's approach to cafeteria management unifies Point-of-Sale, Free and Reduced Application Processing, compliant web-based payments and automated student attendance. As a component of our School Safety & Operation System, our Point-of-Sale service integrates with all modern Student Information Systems. The cloud-based back-end office is securely available anytime from any PC. Our Help Desk monitors POS terminals for network status and performance, enabling an unprecedented level of support. The result is a system that is advanced, easy to use and low maintenance.
